

Tessellate Collective Strawberry and Watermelon with 200mg of pure CBD in a 10ml bottle.

Our range of CBD e-liquid has been developed here on site at our state of the art facilities. This is how we can guarantee it contains only the purest and highest quality EU certified CBD.

Further to this our CBD based products are tested by our sister company Phytovista Laboratories. Their specialist UK based CBD testing facilities are of the highest standards in the UK.

Our CBD Vape Juice is PG/VG 70/30 and developed to work well with most standard vape pens and box mods or vaporisers as they are otherwise known.

Vegetable Glycerine (VG) is a thick, sweet liquid. VG produces luscious clouds of vapour. VG also imparts a sweeter taste to your liquid. Propylene Glycol (PG) is a much thinner tasteless liquid.

PG produces more of a "throat hit" than VG does, which simulates the feel of smoking better. So we developed our CBD e-liquid using the 70/30 ratio as it gave a more satisfying result.

The CBD extract used in this e-liquid is CO2 extracted and is pure CBD at 2%.
